

## WHEN SCHOOL SEATING IS SAFE AND CODE-COMPLIANT, EVERYBODY WINS.

School bleachers stand ready to support your fans. But do they support fans safely? Outdated and damaged bleachers put your school at risk for potential accident liability. Consider this. The National Fire Protection Association (NFPA) requires inspection and repairs of bleachers on a yearly basis. Virtually all bleacher rails installed before 1996 fail to meet current safety code requirements (IBC 2003). And even the best seating systems need regular maintenance and occasional repair to operate safely. A structured program of inspection and maintenance is the best way to avoid risk and protect your seating investment.

### SAFETY IS COST-EFFECTIVE.

The good news is, most bleachers can be improved to meet current safety codes. Hussey Seating can update and renovate your telescopic and fixed seating systems for a fraction of the cost of replacement. This can

save your school tens of thousands of dollars, money that can be used to fund other school improvements. Upgraded seating will look and function like new and deliver a maximum return on your investment.

### PUT THE POWER OF THE FACTORY TO WORK FOR YOU.

Hussey Seating has an unrivaled network of local experts to help you service or upgrade your existing installations. Hussey Regional Service Centers are your exclusive source for

factory-trained and certified technicians and for parts engineered, manufactured and installed to original Hussey Seating specifications. This assures you of getting the very best safety, performance and reliability from your Hussey telescopic and fixed seating systems.

**We stand behind our work with the industry's only two-year warranty on all Hussey OEM replacement parts.**

### GO WITH A WINNER: HUSSEY SEATING

Founded in 1835, Hussey Seating Company is a world leader in developing and manufacturing seating solutions for the sports and education markets. From the luxurious Gillette Stadium in Foxboro, Massachusetts to colleges and schools nationwide, you'll find Hussey wherever fans sit back and relax or cheer at the edge of their seats. Throughout our long history, our products and services have set — and exceeded — the industry standard. We bring our world-class experience, expertise and quality to seating projects of every size.

## BRING NEW LIFE TO OLD FIXED SEATING.

At Hussey, our expertise goes beyond the gym to other seating venues. If your school has an auditorium, lecture hall or performing arts space, we can offer seating solutions there too. Renovating fixed seating lets you revitalize an aging facility at a fraction of the cost of replacement. Retrofitting new ergonomic Quattro seating to existing Concordia stanchions is one beautiful example.

## KEEP SEATS AT THE TOP OF THEIR GAME.

Hussey offers complete on-site maintenance and repair programs to keep your seating system safe and up to code. Ask your Hussey representative about our yearly service contract options.

### SEATING INSPECTIONS

Our factory-trained team will thoroughly inspect all of your bleacher seats. You'll receive a complete safety report and a detailed list of any necessary maintenance or repairs along with an estimate for materials and labor.

### SEATING MAINTENANCE

Of course, the best way to protect your bleachers is to stop damage before it happens. Our factory-certified teams perform preventive maintenance to keep your seating systems in top shape and code-compliant.

### SEATING RENOVATIONS AND UPGRADES

Our team offers several options to renovate and upgrade your seats including installing new modular plastic seating with code-compliant hand rails and adding automatic power operation.

When properly installed and maintained your existing seating system could have decades of safe, useful life ahead.

## SPORT AN ATTRACTIVE NEW LOOK.

There's another advantage to renovating your existing seating system. With an upgrade, your gym will get a new look that reflects your school pride. And the cost of renovation — versus replacement — looks great on the bottom line.

Hussey can easily update your bleachers with durable, attractive CourtSide™ seats. A real step up from wooden and other outdated bleachers, CourtSide™ provides modular contoured seats and ample foot space for enhanced comfort. A great value for your school, these seats are tough, easy to clean and less costly to replace. And because they're manufactured from 100% recyclable materials, these seats are good for the environment too.

### Hussey teams aesthetic appeal with safety, comfort and convenience:

#### RAIL SAFETY

Bleacher rails installed before 1996 rarely if ever meet current safety code requirements (IBC 2003). New Hussey omni-rails bring older bleachers up to date, meeting code requirements and maintaining optimal visibility from the stands. Rail replacement is a fast, easy and cost-effective way to keep your spectators safe and reduce your school's liability risk.

#### ADA ACCESSIBILITY

Our new ADA Compliance Kit offers a simple, affordable way to integrate wheelchair seating into your bleachers. Available in single or double cutout configurations, Hussey Compliance Kits put accessibility within every school's reach, making the right choice an easy choice.

#### SAFETY END-CLOSURE CURTAINS

End-closure curtains let you boost gym safety while displaying your school pride. Durable, affordable and easy to install, they block unauthorized access to your bleacher understructure to prevent injury and vandalism, carry your school's identity and provide "billboard" space that can be sold to sponsors.

#### POWER UPGRADES

Hussey offers power options to upgrade your manual bleachers. Bleachers can be joined by sections and operated as either full banks or individual sections. This improves operation and greatly reduces manpower and set-up time. Or, when power units are not an option, portable power assist units are available.

PORTABLE TRACTOR

■ **Portable Tractor** — One person can open and close sections by moving this tractor from section to section. The tractor operates on standard 115 volt, 20 amp service and can be more economical than individually powered banks.

POW-R-TRAC III

■ **Pow-R-Trac III** — This standard-duty unit features dual soft-faced rubber wheels and direct drive.

POW-R-TRAC IV

■ **Pow-R-Trac IV** — Designed for heavy-duty use, this unit features four chain-driven integral soft-faced rubber wheels.

PENDANT CONTROL

■ **Pendant Control** — This control lets the operator see the entire bank as it opens and closes, an important safety precaution. The pendant control is also recommended to reduce contractor wiring. To prevent unauthorized use, the control can be removed.
